

WORRIED ABOUT FINDING SLIDES AND
DELAYING PATIENT CASES?
IMPROVE YOUR WORKFLOW WITH

Slide Manager by Axlabs

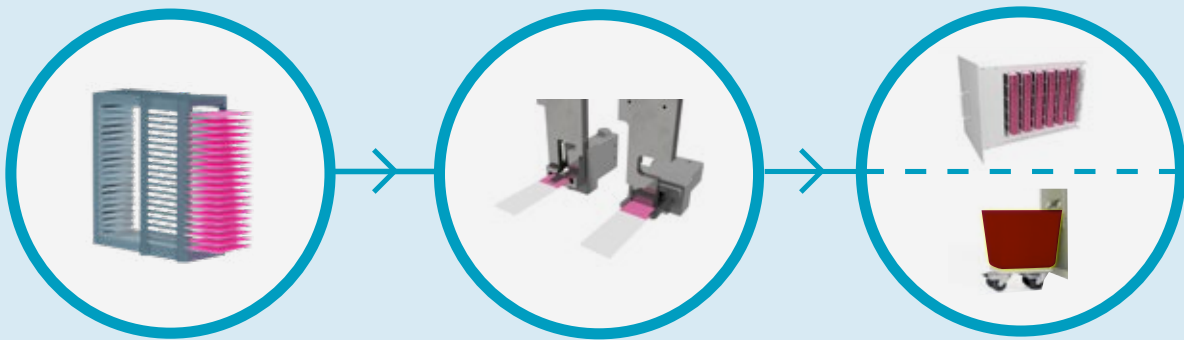

Revolutionizing pathology labs with a true walk away Slide Management System.

Effortlessly store up to 34,000 slides and retrieve them in seconds when needed.

Streamline your workflow by transferring slides directly from the scanner for
**UNPARALLELED EFFICIENCY,
PRECISION, AND TURN AROUND TIME.**

As easy as 1-2-3

1. LOAD

Load your rack after scanning, and Slide Manager will store your slides directly.

2. RETRIEVE

Type or scan the patient ID to retrieve a specific slide or the full patient case.

3. ARCHIVE

After 3 weeks* the slides will be automatically discarded or placed into storage racks.

Ad *) Depends on amount of slides

TRANSFORM YOUR LAB WITH PRECISE SLIDE MANAGEMENT AND COMPLETE TRACEABILITY

- **Rapid Turnaround Time:**
Retrieve any of the 34,000 stored slides in seconds, dramatically boosting lab efficiency and reducing turnaround time.
- **True Walk-Away Automation:**
Once loaded, the robotic system handles slides entirely on its own, allowing you to focus on other tasks while maintaining unparalleled efficiency and eliminating errors.
- **Automated Precision:**
The system archives and retrieves slides with pinpoint accuracy, ensuring seamless operations and eliminating errors.
- **Documentation according to:**
2006/42/ec machinery directive
CE Marking
ISO 9001 Standard
- **Maximized Storage Capacity:**
With the ability to store thousands of slides, including mega slides, the system optimizes space and provides quick access without compromising precision.
- **Effortless Efficiency:**
By eliminating manual handling and ensuring accurate retrieval, Slide Manager accelerates lab operations and delivers unmatched precision and performance.

SLIDE MANAGER IS EXCLUSIVE DISTRIBUTED BY AXLAB AND MANUFACTURED BY KILDE

Who is KILDE:

Danish company established 1970 – for 50+ years, KILDE Automation has been constructing machines and automating processes for industrial and medical companies.

At Odense University Hospital, manual sorting and archiving of small glass slides with tissue samples are a thing of the past. Kilde Automation ... has developed a robotic solution that handles approximately 1,600 tissue samples per day and automatically ensures that the samples no longer occupy storage space ...
