

VISTAPATH SENTINEL

AGENDA

INTRODUCTION

REAL WORLD CASE – PPN (UK)

Sentinel – AI assisted biopsy transfer

What it does

- Compare data from vial and cassette – mismatch > LOCK DOWN
- Chain of custody documentation – photos
- Photos of biopsies to supplement traditional text
- AI image analysis of cassette content
 - Number of pieces
 - Measurements (Length x Width x Height)
- Autogenerated description based on your way of reporting
- Your protocol guides the user
- Your “rules” can be implemented
